

What can we do about Climate Change?

Take Action!

- ✚ **Contact Legislators!** Put your voice out there and target communities that need improvement
- ✚ **Invest in new energy sources** and technology – greater long-term effects, reduce dependence on fossil fuels, possibility of cleaner and safer energy, and encourages new markets
- ✚ **Public Transportation** + carpooling = less gas consumption and emissions from privately owned vehicles, and saves \$\$\$
- ✚ **Outreach programs to save water** and clean up our waterways
- ✚ **Support Green Businesses** and restaurants – spread the word about positive industry leaders
- ✚ **Energy Efficient Products** - and turn off electronics when not in use, especially during peak hours to reduce costs and stress on the electrical grid
- ✚ **Reuse things** like jars and cool whip containers
- ✚ **Don't waste paper** - use electronics instead, they're everywhere
- ✚ **THRIFT!** Reduce water consumption (1 pair of jeans = 2,000 gallons)
